

11th February 2011

WHC Hire Services have been supplying Worcester City Council with equipment, plant and vibration testing services for a number of years now.

In that time we have found the equipment to be of excellent quality and reliability. The vibration testing and monitoring provided by WHC has proved to be an invaluable addition to our Health and Safety Policy.

WHC have a 24/7/365 support service. Their staffs are always courteous and friendly and nothing is too much trouble when either phoning or turning up out of the blue for assistance or equipment.
